

YORK®

Integrated Package Heat Pumps
2–5 Tons

A complete residential packaged portfolio delivering world-class comfort, efficiency and reliability

From the brand that powers the most critical locations on the planet, YORK® package heating and cooling units deliver unmatched flexibility backed by relentless innovation, premium quality and global strength. With a portfolio offering durable, entry-level comfort solutions all the way to premium systems with maximized energy savings and customized control, YORK package heating and cooling units offer the versatility, performance and year-round comfort today's customers demand.

A better fit for every home

Whether homeowners want to balance affordability with efficiency and reliability or the most advanced comfort available, the YORK integrated package heat pump portfolio includes solutions to fit every home. With expanded installation approaches and a variety of performance tiers, contractors can offer the solution that fits their customer's comfort needs. And thanks to a long legacy of proven engineering paired with innovative technology including advanced inverter-driven performance, contractors can be sure any solution a customer chooses will bring years of efficiency and comfort.

Performance tiers		
Entry	Mid	Premium
• A balance of efficiency, reliability and affordability • Single-stage performance • Single- and three-phase availability for broader application flexibility	• Greater efficiency and long-term savings • Horizontal and vertical options • Installer-friendly features • Dual fuel option available with PD5 package unit	• Most advanced comfort experience, maximum control and energy savings • Fully modulating inverter performance • Broad thermostat compatibility • Easy service access and on-board diagnostics

Entry tier package heat pump solutions offer proven, self-contained rooftop or ground-installed solutions for applications where reliability and exceptional value matter most.

Mid tier package heat pump solutions are perfect for homeowners who prioritize long-term energy savings, improved day-to-day comfort and quieter operation that lasts.

Premium tier package heat pump solutions offer more consistent temperatures, better humidity management and advanced control features with smarter system operation.

Proven performance and advanced engineering

The entire YORK portfolio of integrated package heat pumps reflects decades of HVAC expertise and a focus on durability, ease of service and highly optimized operation.

Exceptional construction:
Designed for extended performance, including stainless-steel heat exchangers, durable powder-coat finishes and high-performance blower and fan design.

Proven and backed durability:
10-year heat exchanger, 10-year parts and 10-year compressor limited warranties on PL5, PD5 and PH3 units. Up to 10-year limited parts warranty* on PH9 and PH5 units. 10-year compressor and parts limited warranties on all models, with added heat exchanger coverage on select models.

Advanced technology:
Select premium models include modulating inverter compressors, ECM motors and on-board diagnostics for faster maintenance and more accurate comfort.

More solutions for more applications

Model name	Tier level	SEER2	HSPF2	Position	Controls
 **PH9** Modulating (variable-speed)	Premium	19.0	9.0	Horizontal/ vertical	Communicating
 **PL5** Modulating (variable-speed)	Mid	15.2	8.1	Horizontal	Communicating
 **PD5** Two-stage Single-phase Constant CFM			7.2	Horizontal/ vertical	Standard
 **PH5** Two-stage Single-phase Constant CFM			7.2	Horizontal/ vertical	Standard
 **PH3** Single-stage Single- and three-phase	Entry	13.4	6.7	Horizontal/ vertical	Standard

*This standard offering covers all components incorporated at the time of manufacture.
All other components or parts purchased from YORK and installed in the field have a 1-year parts limited warranty.

Elevated efficiency and year-round comfort

The complete YORK portfolio includes efficiency options from 13.4 SEER2, 6.7 HSPF core models up to 19 SEER2, 7.2 HSPF premium models, allowing contractors and homeowners to find the perfect level of performance and features. And across the portfolio, quiet-comfort features are available, delivering sound levels as low as 60 dBA.

As part of a complete offering, YORK integrated package heat pumps offer greater versatility, exceptional performance, proven engineering, faster installation and easier service — no matter the application. The portfolio also includes additional offerings with advanced, inverter-driven performance, for even greater comfort consistency and energy savings.

Industry-leading warranties	
PH9/PH5	PL5/PD5/PH3
Up to 10-year limited parts warranty. This standard offering covers all components incorporated at the time of manufacture. All other components or parts purchased from YORK and installed in the field have a 1-year parts limited warranty.	10-year heat exchanger, 10-year parts, 10-year compressor limited warranties.
